

Press Release - For immediate release, 09.08.2024

Thomas Struckmeyer joins NEMIS Board of Directors

NEMIS Technologies AG welcomes Thomas Struckmeyer in the Board of Directors. Thomas will serve as a board member and spearhead NEMIS commercial development, driving growth and expanding market presence. His deep industry knowledge and successful track record in strategic expansions are critical elements to further accelerate NEMIS innovative diagnostic solutions.

With over 30 years of leadership in the diagnostics and animal health sectors brings an extensive track record:

- Former CEO and Executive VP at BioChek-Hygiena, where he endorsed a One Health approach in food safety diagnostics.
- Pioneered the world's largest DNA-based traceability solution for the food-producing industry while at IdentiGEN.
- Led key account management and product development at Prionics AG, significantly enhancing their global commercial strategy.

Since June, Thomas leads Ender Diagnostics as CEO, a Swiss company in the field of veterinary applications.

Roger Meier, Chairman of the Board, commented:

“We are very pleased to welcome Thomas to the Board of Directors. With him, Nemis has not only gained a profound expert in our industry with an outstanding track record, but also an opinion leader who will further sharpen our value proposition and help us to bring our holistic customer solutions forcefully to the markets. »

Mario Hupfeld, CEO of NEMIS adds:

“Thomas embodies perfectly the NEMIS vision of a One Health approach and our ambition to become a food safety solution provider from prevention to prediction. We are happy to have found such a strong supporter for our mission and the whole team is extremely excited to work with him.”

About NEMIS Technologies AG

NEMIS Technologies AG (www.nemistech.com) was founded January 2018 and develops and commercializes rapid on-site diagnostics solution for the food industry. With its patented core chemistry AquaSpark™ and proprietary phage technology it has built the revolutionary N-LIGHT™ platform for environmental monitoring of dangerous bacteria such as *Listeria* and *Salmonella*.
